Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-4, 7-11 and 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over the acknowledged Prior Art disclosed in applicants Figs. 6A and 6B in view of Nakagishi (U.S. Patent No. 6,424,068 B2).

Prior Art Fig. 6B discloses a rotor 102; a first bearing 101a; and second bearing 104a. The lever 102 is connected to a not shown light quantity adjusting device. The Fig. 6 B also discloses a Hall element 118 to detect the position of the rotor. Fig. 6B shows the yoke 105 arranged in a position shifted in a thrust direction with respect to the magnet (see the paragraph bridging pages 2 and 3 of applicant's disclosure). A bias in the radial direction is described on page 6 lines 3-6 of applicant's disclosure. The acknowledged prior art discloses the claimed invention, except for the first bearing having a tapered shape. Nakagishi discloses a motor device for controlling a device that requires high stability. Tapered and semi-spherical bearings, some embodiments with biasing means for the bearings, are disclosed by Nakagishi to obtain high stability of undesired movements. It would have been obvious to one of ordinary skill in the art, at the time of applicant's invention, to substitute improved bearings of tapered or semi-spherical shape, biased or unbiased, for the bearings of the acknowledged prior art in order to obtain the desirable feature of improved stabilization of the light quantity adjusting means.

***Response to Arguments***

2. In the remarks filed December 30, 2004, applicant appears to have made no arguments concerning the rejection based on acknowledged Prior Art Figs. 6A and 6B in view of Nakagishi (U.S. Patent No. 6,424,068 B2). Thus, the record appears to indicate that applicant is in agreement that the claims are unpatentable based on this grounds of rejection.

***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
